

## Menardi FF-B filter frame

### FF-B

Menardi FF-B is a front service filter frame for installation of bag and compact filters.

Menardi FF-B offers a simple frame installation, firm and leakage free filter installation and easy to service. The filter frame is excellent for building single filter holders and large filter walls when front (or @ low filter class backside) is allowed and air tight installation is required.

The frame consists of an L-shaped outer frame with 4 filter clamps, one in each corner of the frame.

Can be supplied with different header frame thickness and multiple installations, for example pre filter frame/ filter and bag filter.

- Used as front service frames (or in some cases also clean side service) for bag and compact filter.
- Available for all standard filter sizes and also in customized dimensions.
- Can be supplied in galvanized steel, stainless AISI 304 and AISI 316L.
- Multiple filter stage design as option.

Standard sizes

Dimensions [mm]	Filter size [mm]	Item No, galvanised steel	Item No, 304L
